

BODYGUARDS® TAEKI5™

High Performance Safety Gloves

What is Taeki5™?

The Taeki5™ range of high performance safety gloves has been created with total hand protection in mind. Taeki5™ integrating HPSH fibre is the only yarn on the market to give a complete pallet of properties in a multitude of glove designs.

Where other fibres will fail in heat contact resistance or abrasion, Taeki5™ will be there to give you the complete properties and protection as follows:

High Abrasion Resistance

Level 4 according to EN388 on all styles even on light weight 13G construction

High Cut Resistance

Level 5 EN388, level 3 to 5 on ASTM/ANSI depending on construction

High Heat Contact Resistance

100°C up to 350°C according to EN407. This makes Taeki5™ also suitable for a wide range of constructions as inner liner for leather gloves or high heat resistance item.

High Comfort and Fitting

Stretchable and breathable material to allow perfect fit, dexterity and wearing comfort. Soft touch and low density to reduce hand fatigue and allow comfortable wearing during long working hours.

Lint Free construction suitable for cleanroom environment and application requiring clean condition like automobile or electronic application

No change of colour and properties to light or UV exposure.

Available in a variety of colours to suit your working requirement. From light to dark colours including high visibility, you will find the colour to match your safety or corporate need.

Washable

Very low to zero shrinkage and excellent wearing comfort to numerous washing cycles. Increase the durability and value of the glove.

Bodyguards TAEKI5™ Cut Resistant Lightweight Stringknit Nitrile Foam/HCT Palm Coated Gloves

These gloves are designed to offer cut resistance in applications where abrasive sharp edges are present.

HCT coating provides a good grip on oily surfaces as well as abrasion resistance.

• 120 pairs per case.
